

[LIQUID CRYSTAL DISPLAY PANEL AND METHOD OF FABRICATION THEREOF]

Abstract

A liquid crystal display panel comprises a first substrate, a second substrate, a sealant, a liquid crystal layer, and a light-shielding layer, wherein the sealant is disposed between the first substrate and the second substrate; the liquid crystal layer is disposed among the first substrate, the second substrate and the sealant; and the light shielding layer is disposed on a surface of the first substrate but not in contact with the liquid crystal layer.
